All products must be inspected once removed from the packaging and The Radiator Company notified within 28 days of delivery of any scratches, blemishes or other damage. The Radiator Company will then replace the radiator.

Imperfect radiators should therefore not be fitted and The Radiator Company will not accept responsibility for replacement of scratched or damaged radiators once they have been fitted. This includes any consequential loss or cost of fitting.

If The Radiator Company are not notified within 28 days of the date on the signed delivery note then it will be deemed that The Radiator Company have fully complied with its obligations and claims will not be considered.

We recommend that after you check the product on delivery that it is stored in its packaging to prevent damage prior to installation. The Radiator Company cannot accept responsibility for items damaged after delivery.

Please read these instructions and terms and conditions carefully prior to installation. Failure to do so may invalidate the warranty.

The guarantees in all cases are subject to the products being installed in accordance with British and or European standards as well as these fitting instructions. The guarantees in all cases are restricted to the free of charge replacement or repair of the failed product only. Our liability will under no circumstances extend beyond the repair or replacement of the product supplied by us. Claims for either labour in replacement or damage to property are not admissible. Any goods that are returned, in the event of a problem, will belong to The Radiator Company.

You should have:
- 1 Radiator
- 4 Wall brackets (only Single model)
- 4 Wall bracket Studs (only Double model)
- 4 Wall bracket Sleeves (only Double model)

You will need:
- Tape measure
- Electric drill and bits
- Spirit level

Contents

You should have:
- 1 Radiator
- 4 Wall brackets (only Single model)
- 4 Wall bracket Studs (only Double model)
- 4 Wall bracket Sleeves (only Double model)

You will need:
- Tape measure
- Electric drill and bits
- Spirit level

Mark and Fix Brackets

Ellipsis Single

1. Screw on the bracket studs to the radiator.

2. With the bracket studs securely fixed, you may either hold up the radiator to the wall and mark out the bracket sleeve positions, or use the dimensions on the appropriate drawings opposite.

Ellipsis Double

There are no fixed bracket positions for the Tallis Double, however for even weight distribution we suggest placing the brackets close to the collectors and between the top and bottom two elements (please refer to diagram opposite)

1. Using the bracket diagram as a guide, position the bracket heads between the elements and secure with the supplied screw.

2. Offer up the radiator to the wall and mark the position on the wall for the bracket sleeves, and fix to the wall using suitable drill bits and plugs.

3. Offer up the radiator to the wall and slot into the bracket sleeves, and mark the positions for the bottom two brackets sleeves. Take down the radiator, and using suitable drill bits and plugs, hang the bottom two bracket sleeves.

4. With all 4 brackets fitted, tighten the grub screws on the side to secure.

Commission

Please Note:
In accordance with Part L1 2006 of the Building Regulations and BS7593:1992 code of practice for the treatment of hot water and central heating systems, we strongly recommend flushing the heating system post installation of new radiators and then adding the correct quantity and type of inhibitor for use with your radiator and system to prevent corrosion. Damage caused to systems not protected by a suitable inhibitor will not be covered by manufacturer’s guarantee.
