

# Vip & Oscar Royale

We have given our stock white aluminium lines (Vip & Oscar) the royal treatment. With 4 striking powder coated special finishes and fitted with end panels as standard, these models have all the benefits of Aluminium's thermal properties giving them great outputs and fast response to changes in temperature; as well as a unique designer style.

Vip Royale 690 x 800 shown in Polished Silver with Mini Cube valves.

## Product Information

### Technical Details & Prices page 131

Vip Royale; 8 models in 2 heights & 4 widths.  
Oscar Royale; 8 models in 2 heights & 4 widths.  
Set sizes only. End panels come as standard.  
Outputs from 2133 to 8109

## Colours

Available in Textured Light Grey, Textured Black Gold, Textured Matt Black and Polished Silver.

Please call **01342 302250** for colour charts.

## Delivery

**3 - 5 working days for all finishes**

# Vip & Oscar Royale

Vip Royale 690 x 640 shown in Black Gold with Cylinder valves.

# Aluminium shown on pages 36 - 45

All stocked radiators have prices listed in purple and will be delivered in 3 - 5 working days.

The Aluminium range is incredibly versatile with hundreds of possible size options across the range. When selecting the best configuration for your room you can alter the height and number of sections to achieve required BTU output within a fixed space.

- All prices and outputs for Vip and Oscar Royale are given per set size; all others are given by section.
- Royale prices include; plugs bushes, airvent, wall brackets and side panels
- Price per section includes plugs, bushes, air vent and wall brackets

These simple steps will help you choose a product that matches your requirements.

**1. Calculate output & number of radiators per room**  
To find the output you require for each radiator identify the heat output for each room, for a detailed explanation on output see page 160 or visit our website at [www.theradiatorcompany.co.uk](http://www.theradiatorcompany.co.uk). You should always check your requirements with your installer.

**2. Choose your preferred model option**

The Radiator Company Aluminium range is available in set sizes from the Royal ranges or a choice of 8 sectional models.

**3. Choose a Height**

Decide on a section height that matches the space available, allowing an additional 100mm to 150mm minimum clearance from the floor for pipe work & air flow. Height options in the sectional models vary; Heights up to 890mm select from; Vip, Mix, Vox, Ekos 95, Ekos 130 & Klass.

Heights from 946 - 2070 select from; Oscar & Ekos Extra.

**4. Calculate the number of sections you require**

Listed next to each section, under 'BTUs', will be the output each section gives. Divide your required output by this number to find the total number of sections needed to match the output; e.g. if you have chosen a Mix 590mm high then 6048 BTUs divided by the section output of 420 BTUs = 15 sections.

**5. Check the width**

Check the number of sections you need will fit into the available space. Our Aluminium sections come in two widths; Vip, Vox, Mix Oscar, Klass = 80mm Ekos 95, Ekos 130 and Ekos Extra = 50mm e.g; 15 section Mix radiator 590 high will equal 15 x 80mm = 1200mm wide, plus 28mm for bushes, plus valves. If this is too wide then, if possible,

increase the height of each section

e.g: Mix 790mm high = 6048 BTUs divided by 549 BTUs per section = 11 sections = 880mm wide; plus bushes, plus valves.

The maximum number of sections that we can deliver in one piece is 20 (10 for Oscar & Ekos Extra). Larger radiators will have to be joined on site by your installer which will require the appropriate tools, available from us with a refundable deposit.

**6. Choose any accessories required**

You can choose from a selection of accessories to enhance your radiator

- End panels for Vip and Oscar
- Hanging Pegs
- Towel bars
- Multi brush to keep the section free from dust; maximising air flow.

**7. Place your order**

Place your order quoting the product code of your selected section plus the number of sections required.
