Galvanised Finishes

We have developed a range of truly unique, stunning and "on trend" finishes in classic Antique Copper, Antique Brass and a more contemporary Satin Nickel. We take individual sections of Ancona®, hand polish every part of the section, then using the hot dip galvanising process (similar to chroming) we create the finish. 5 stages in total are needed with a final hand brushing and lacquer. The result, is distinctive and hardwearing, with each radiator completely unique due to the amount of hand finishing.
