↑ Position of element electric models

The Lupin Electric range is available in white & chrome and supplied with a fully controllable electric element. Offering 8 function modes, they can be set to operate when you wish, on a daily basis or you can select one of the three pre-set programmes. The Open Window function detects an open external door or window and will turn the radiator off if it which is allowing heat to escape so saving energy and money.

- Boost mode (2h at max power)
- Timer mode (configure different temperatures value for each hour and day of the week),
- Comfort mode (desired user temperature),
- Night mode, Pilot-wire mode, Antifreeze mode, Holiday mode
- Adaptive Start Control, open windows, ON/OFF button and a security lock for children.

*Saving based on the value of individual items when bought separately. Order any of our selected valves & matching pipe covers at the same time as your radiator; PROMOV3W (white), PROMOV3C (chrome).
